

Odd Bits Of News

Los Angeles, Calif.—Mrs. Walter W. Akers was brought back to life recently by three physicians after she had been actually dead for more than ten minutes. The "miraculous" was performed by manipulating the heart until it began to beat and by artificial respiration.

New York.—A sailing vessel has arrived in port whose crew did not know of the present war.

The boat was the Padang. She left Padang, Sumatra, on Aug. 12 and did not speak any vessel until just outside of New York, where she was hailed by a British cruiser.

London.—Irvin S. Cobb, writer, interviewed Lord Kitchener recently.

Kitchener gave the interview under the impression that he was to meet Ty. Cobb, the ball player.

Los Angeles, Calif.—E. R. Davis supports a family of fourteen on a one and one quarter acre of ground in spite of the fact that he has but one arm.

New York.—Moses Wooler celebrated his 100th birthday with a party at which he made encouraging efforts to learn the tango. Wooler is positive he will live to be 140, and it's his greatest ambition.

"He walks daily without a cane, reads the papers without glasses and never has been seriously ill.

West Falmouth, Mass.—Miss Martha Palmer disappeared six weeks ago and when she reappeared she said she had been wandering in the woods eating acorns and berries.

She made the experiment, for her health and says she never felt better than she does now. Healdsburg, Calif.—A remarkable fall from the heavens of meteoric flesh took place here recently. The floss ranged in size from tiny specks to sheets 20 feet square.

A New Ford Story

Here is a new Ford story we saw somewhere, but have forgotten just where. A man in California writes to the Ford company and tells them they should feel very much excited for the reason that the Ford is the only car mentioned in the Bible and to prove it cites them to passage in Isaiah which says: "He went up into Heaven on high" and asks what other car but a Ford could do that?

R. A. McClellan, one of the good democrats of the Hayden country, was a business visitor in the county seat the first of the week. Mr. McClellan was appointed deputy assessor of his district, and will immediately get busy on the 1915 assessment.

THE SERENADERS.

A fiddler tried a serenade;
She didn't smile on him
She scorned the music that he made—
Zim-zim.

A fellow with a banjo came;
The damsel didn't think
It worth emerging for his tune
Plink-plink.

The third arrival won the girl,
Although his tune was punk.
He drove up with a noisy whirr,
Honk-honk!
—Puck.

MY FRIENDS.

I tried to count my friends one day—
Since that day I have walked
in awe.
I stopped my counting in dismay.
For, stretching far, in long array,
Still friends and friends I saw.
And then I said, all chokingly,
And faint with weight of happiness,
"Dear God, I pray that I may be
The man they think me—nothing less.
Oh, let me be until life ends
The man they think me, these
my friends."
—Mary Carolyn Davies in
Youth's Companion.

GIRLS NEARLY DIE OF THIRST IN BIG DESERT

On Walk to California Their Canteen Springs a Leak.

Chesaning, Mich.—According to letters received by Chesaning friends from Misses Marie and Kittle Billefritz, the girls had a narrow escape from death by thirst while crossing the Nevada desert. They left Saginaw last spring to walk to the coast and are now in San Francisco, having completed the journey successfully.

At the point where they crossed the desert it was fifteen miles between human habitations. When they were five miles on their way they discovered that their only canteen had sprung a leak and that there was very little water left. They drank this and then hastened their pace. It was a race against death.

Very soon their tongues swelled up from lack of water and their faces turned purple. It was intensely hot, with no shelter of any kind. Several times one or the other, exhausted, was ready to give up and lie down beneath the blazing sun, but they struggled on. "If the courage of both of us had given out at the same time we surely would have died there," said one of the letters.

As they were staggering along, dazed and half blinded, the building which houses a pool in the desert was discovered on the horizon. Their strength was almost spent, but they reached the spring, crawling the last few rods on their hands and knees. They were too inexperienced to drink sparingly, and overindulgence almost completed the work which privation began. They finally managed to reach a little town on the edge of the desert and there spent the night.

AIR CRAFT TEST LABORATORY.

Second of Its Kind and Most Elaborate Opened in Bay State.

Boston.—At the Massachusetts Institute of Technology a new aerodynamic laboratory, second of its kind in this country, has been opened. Its equipment for testing aerodynamic devices and models of air craft is said to be the most elaborate in the United States. The government has assigned Assistant Naval Constructor Jerome C. Hunsaker to duty as superintendent of the laboratory, which is expected to prove of great service in training the future builders of aeroplanes and dirigibles and in giving assistance to constructors who have begun the work of upbuilding the nation's aerial fleets.

Germany Won't Buy Our Oil After War.

Amsterdam.—Professor Wygodzinski, lecturer on economics at the University of Bonn, in discussing in the Koelnische Zeitung the economic measures which Germany will adopt after the war, expresses indignation at the United States for not insisting that Great Britain permit the passage of petroleum. He declares that after the war Germany will make herself independent of American oil generally.

DIFFICULTIES.

The more powerful the obstacle the more glory we have in overcoming it, and the difficulties with which we are met are the marks of honor that set off virtue. —Mokere.

LIFE IS A SERVICE.

There is one wish ruling over all mankind, and that is a wish which is never in any single instance granted—each man wishes to be his own master. It is a boy's beatific vision, and it remains the grownup man's ruling passion to the last. But the fact is life is a service. The only question is, Whom will we serve? —F. W. Faber.

REGAINS SIGHT AT NINETY.

Operation Restores Vision to Veteran of Two Wars, Blind Thirty Years.

Philadelphia.—"I am sorry I have had my first glimpse of the world after so many years on a cold, rainy day," said Captain Isaac Williams, who is ninety, a veteran of the Mexican and civil wars. He had been blind nearly thirty years. He was operated upon by Dr. Mary Buchanan a few days ago, and now he says he can see as well as the day he watched Pickett's men as they marched across the field at Gettysburg.

"Somehow I had been wondering if my first look at the things I used to know by sight would be on a day when I could see the sun," the aged man said wistfully. He received many cheers seated in the old arm chair in which he had spent nearly all of his thirty blind years.

"Let me see. This would be Sally," he said once as a white haired woman took his hand. "I am glad to be able to have another look at you after all these months."

"But I am not Sally," the woman replied with a laugh. After that the old man listened to his caller's voice before he spoke the name.

"You see," said the old soldier, "everything is new to me."

MEAT AT 50 CENTS; SHOES \$10

Experts See This in Two Years Owing to Shortage in Cattle.

Chicago.—Meat at 50 cents a pound and shoes at \$10 a pair are possibilities in the next two years, in the opinion of government and stockyard experts after taking a census of the cattle in the country and finding the visible supply less than 35,000,000 head. As this includes calves, yearlings and full grown stock, the number of animals capable of breeding is reduced to an alarmingly deficient supply.

"Meat in America will be a rarity before the war ends, with its drain on our supply," said Henry J. Williamson, government statistician in the department of agriculture.

"Unless scientific breeding becomes general and the slaughter of calves ceases before five years have expired America will find herself in the class of European countries that have to look to importation to supply meat."

LOVE AT SEA.

Where shall we find you, sweet?
On fields of strange men's feet,
Or fields near home?
Or where the fire flowers blow?
Or where the flowers of snow?
Or flowers of foam?
We are in love's hand today.

Land me, she says, where love
Shows but one shaft, one dove,
One heart, one hand
A shore like that, my dear,
Lies where no man will steer.
No maiden hand
—Algernon Charles Swinburne.

CAMPAIGN AGAINST INSECTS.

New Annual Report of Government Entomologist Shows Progress.

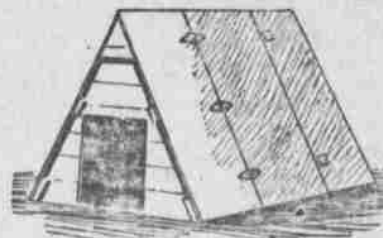

The control of such dangerous insects as the gypsy moth, cotton boll weevil, alfalfa weevil, green bug and potato tuber moth has kept the office of the United States department of agriculture's entomologist busy during the past year, according to the new annual report. Besides directing its attention to combating insects that attack crops, the office has been active in attempting to eradicate insects that affect the health of man and animals, such as malaria bearing mosquitoes, the spotted fever tick and the typhoid fly. Special attention has been given to insects injuring forests and those affecting stored products, such as grain, flour, prepared cereals, meat and cheese. Work in bee culture has also progressed satisfactorily.

The gypsy moth campaign, waged also against its cousin, the brown tail moth, has been very encouraging, there being a marked decrease this year in the numbers of both these pests. Parasites and beetles that attack these dangerous insects have been introduced and have been largely instrumental in bringing about good results. Colored posters were prepared by the office illustrating the gypsy moth and its natural enemies, and these were posted in all postoffices and town of flies in the infected districts, and copies were sent to granges and public libraries. The campaign has also been waged by mail and boy scouts, who have distributed cards bearing the same illustrations.

A combination spray composed of lime sulphur, arsenate of lead and nicotine has been used successfully during the year by many orchard growers to control insects and fungous diseases. Other poisons to control orchard insects have been developed and are now being tested. Arsenical sprays are being made more practicable for use in combating cranberry pests in New Jersey. Effective spraying has also been done in the peach orchards of the south, interested growers aiding the department in the work. Remedies are also being recommended and developed for pests that endanger apple, peach and pear orchards.

Economical Hog House.

The A type of hog house for farrowing sows is popular with many hog raisers. The house shown reproduced from Country Gentleman can be built to good advantage at small cost. The building shown is called the Economy house. It has floor dimensions of 5 by

7 feet. This house, built to use an earth floor, costs \$9.07, figured on the same basis as the regular Iowa or A house. From the standpoint of economy, this house at less than \$10 is the most convenient and handy movable or portable type.

WINTERING BEES OUTSIDE.

It is a common practice in New England to winter bees on their summer stands, and this is a perfectly safe plan if suitable protection be given. Probably the simplest and most successful method is to keep the bees in ten frame hives and to remove the end frame on each side with a chaff division board. This confines the cluster to eight frames and keeps it away from the cold walls.

In any case the top of the hive should have careful attention, for that is where the greatest danger lies. The best plan is to tack a piece of burlap on the bottom of a super or a winter case and set it over the hive without any board under it. Then the super should be filled with shavings or chaff. This arrangement allows for the gradual escape of moisture from the hive and gives greater satisfaction than the use of a board over the hive. An ordinary hive cover may be used, but the new metal roof double cover is much to be preferred.

When this general plan is adopted it is a simple matter to feed the bees even in winter by using the sugar cakes now on the market. These cakes come in pie tins which are inverted over the frames and may be slipped in place at any time by simply raising the super a little. American Agriculturist.

Bolingbroke's Retort.

When Bolingbroke, who was at Aix-la-Chapelle during the treaty of peace at that place, at which time his attitudinizer was not removed, was asked by an impertinent Frenchman whether he came there in any public character, his lordship answered: "Not at all. I came like a French minister, with no character at all."

YOU MAY BE SORRY

IF YOU ACCEPT A SUBSTITUTE FOR

This Reliable Cough Medicine

That cough is nature's cry for help. It's a warning—a symptom, maybe of bronchitis, laryngitis, even of pneumonia. It must be checked at once. Hurry to the drug store for

Foley's Honey and Tar Compound

AND BE SURE IT IS THE GENUINE

Don't take a chance with a substitute. Unreliable coughs quickly get worse, especially at nightfall. FOLEY'S HONEY AND TAR COMPOUND will soothe and heal the irritated throat, take away the tickle and relieve the tight feeling in the chest. It has no equal for any kind of cough.

For over forty years FOLEY'S HONEY AND TAR COMPOUND has been the standby with thousands of families.

Remember the name—FOLEY'S HONEY AND TAR COMPOUND and look for the beehive on the yellow wrapper.
